About us

Biberschatz was created by Iva, Pavel & Christian after trying to find a solution that combats the discomfort of growing those shiny white teeth. We came up with a range of products that not only offer comfort to your little ones but at the same time help every mother to feel special and beautiful.

Teething happens not only indoors, but when you are on the go as well and this is where our products can help you the most. Keep the little fingers out of your nose, hair and mouth.

Chewing on stuff helps relief the discomfort from the emerging teeth, it also distracts the baby from the pain and it helps them experience happier thoughts and moments.

Our mission is to make every mother & baby feel happy and beautiful!
